## Adalberto Romero Romero

## Full-Stack Developer / Software Engineer

+52 221 625 0235 | California, USA / Puebla, MX | <u>Adalromero99@gmail.com</u> | <u>linkedin</u>

Education ------

University Instituto Tecnológico de Puebla University

Courses: Software Engineering, Web programming, Database Programming

Professional Experience -----

Full-Stack Developer | AI Engineer | Outlier AI |

2024 September - Present

- Developed prompts and response algorithms using Python, optimizing AI outputs for complex math-related queries as well as ensuring human-like conversational tone for simpler queries.
- Enhanced the LLM through human interaction training and integrated image learning to improve AI comprehension and contextual understanding.
- Collaborated on refining AI capabilities to deliver more natural and user-friendly interactions.

Software Engineer | FullStack Engineer | Vega Financial | Engineer III

2020 Jan - Present

- Advanced from intern to senior software engineer over 5+ years, leading full-stack and DevOps initiatives.
- **Rebuilt backend workflows in Python**, replacing legacy Java code and reducing invoice processing time by 40%.
- Set up Dockerized infrastructure with AWS, improving deployment speed and internal system performance.
- Built a modern client-facing landing page using React and TailwindCSS to enhance user experience.
- Automated data validation processes, cutting manual errors by 60% and boosting operational efficiency.
- **Mentored junior developers** and aligned technical efforts with business goals.

**Software Engineer** |JL| *Financial* |

2021 May - Sep 2024

- Developed and deployed a Python-based Smart Inventory Management System (SIMS) using Docker, enabling scalable and efficient inventory operations.
- Automated data categorization and validation processes, reducing manual effort and minimizing errors in inventory records.
- Streamlined backend workflows and containerized the application for consistent deployment across environments, accelerating development and maintenance cycles

Full-stack engineer | Status Pro. Inc | Team Leader

2023 July - May 2024

- Streamlined website performance by implementing data-cleaning programs to eliminate bugs.

- Contributed to developing a program integrating ChatGPT-4, enhancing client interactions for 200+ users on future websites.

Projects -----

## **Web Development** | *RomeroLandScapeLLC*

Dec 2023 - April 2024

Content Management

• Created and published engaging web content tailored for the landscaping industry.

• Ensured website readability and SEO optimization.

- Designed and built a responsive webpage using modern web technologies.
- Familiar with HTML, CSS, and basic JavaScript for front-end development.

Technical Skills ------

Languages: Java, JavaScript, CSS, PHP, Python, C#, C++, HTML, JSON, Nodejs, GIT, ASP.NET,

VB.NET, AWS-services

Database: MYSQL, SQL, MongoDB, PHP

Certificates: HTML, CSS, and Javascript for Web Developers Johns Hopkins University,

IBM Introduction to Software Engineering,

**Specialization:** DevOps on AWS Specialization from Amazon Web Services

**Spoken Languages:** English (Native), Spanish (Fluent)

**Skills:** 

- Strong problem-solving skills and attention to detail,
- Excellent communication and collaboration abilities
- Ability to work independently and as part of a team
- Experience in B2B customer service
- Technical proficiency
- Project management skills
- Agile. Scrum master / Sprints
